

ELK MOUND WATER UTILITY NOTICE

The Elk Mound Water Utility is currently in the process of changing all residential water meters to comply with WDNR no lead / low lead rule.

Section 1417(a)(1) of the SDWA states that “no person may use any pipe, any pipe or plumbing fitting or fixture, any solder, or any flux, in the installation for repair of any public water system or any plumbing in a residential or nonresidential facility providing water for human consumption that is not lead free.” Under section 1417(d), “lead free” means that solders and flux may not contain more than 0.2 percent lead; pipes, pipe fittings, and well pumps may not contain more than 8.0 percent lead; and plumbing fitting and fixtures must meet standards established under section 1417(e).

Please contact the Water Utility at 715-879-5805 to set up an appointment to have your water meter upgraded to a lead-free meter.

Thank you in advance for your prompt response!
